Designed and
Engineered
in the UK. 

About

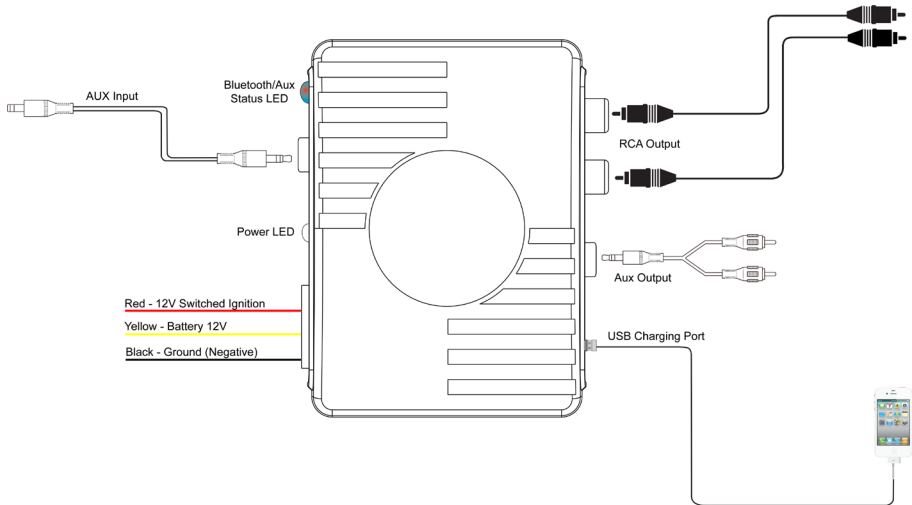

The AIRSTREAM12V allows you to connect any Bluetooth A2DP enabled device wirelessly to your car stereo, enabling you to stream music and other audio files. Simply pair your Bluetooth enabled device to the AIRSTREAM12V and connect the AIRSTREAM12V to the Aux input of your car radio to experience high quality wireless audio.

The AIRSTREAM12V also offers a wired AUX input as an alternative audio input and a 5V USB port for charging of devices only.

Installation

The AIRSTREAM12V can be installed in the glovebox in order to provide discreet, easy access.

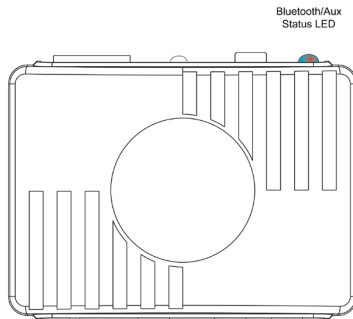

1. Connect the black wire to Ground.
2. Connect the red wire to a 12V Switched Ignition Source.
3. Connect the RCA/Aux Output of the AIRSTREAM12V to the RCA/Aux input of the car stereo. Note that both RCA and Aux Outputs can be used at the same time.
4. When the vehicles Ignition is turned on, the Power LED should illuminate green.

Bluetooth Pairing

In order to stream music wirelessly, you must first pair your Bluetooth enabled device with the AIRSTREAM12V.

1. Enable Bluetooth on the device you wish to pair.
2. Search for Bluetooth devices and select 'Connects2'.
3. The Bluetooth/Aux Status LED will flash blue and then remain illuminated when pairing is complete.
4. Select the Aux input source on your car stereo and you are ready to stream audio from your device.
5. If Bluetooth is enabled on your device, pairing will be automatic for future connections.

Aux Input

1. If an Aux cable is connected to the Aux input of the AIRSTREAM12V, this will take priority over Bluetooth mode.
2. To enable Bluetooth mode, disconnect the Aux cable from the Aux input. The Bluetooth/Aux status LED will be illuminated Blue in Bluetooth mode and Red in Aux mode.
